

PALLET RACK

STANDARD FEATURES

- Easily modifiable to fit your specific shelving needs
- Carefully engineered system designed to provide highly efficient storage of palletized items
- Durable powder coat enamel for long lasting color
- Variety of beams and uprights available to meet your load capacity needs
- Penco's one piece beam design provides the highest strength to weight ratios

Beam Locking Key for Safety

A unique recessed safety key made from heavy gauge steel engages a slot in the side of the post. It resists an upward force from material handling equipment up to 1000 pounds. It is an integral part of the beam assembly, can be engaged easily without tools, and is clearly visible for checking.

AT A GLANCE

ABOUT PENCO

Penco's nearly 155-year history of providing a full range of storage solutions, achieves an unmatched level of expertise and innovation of products and high level of customer support.

PALLET RACK PLUS

- Engineered for use in areas where high seismic activity or other severe conditions exist
- Frames and beams more resistant to horizontal and vertical forces
- 4 connectors instead of 3 for a stronger connection between the beam and upright post to resist conditions with higher lateral forces
- Larger footplate allow for up to (4) anchors, and provide installer with more options for floor anchoring
